features: short sleeve

TECHNOLOGIE DRYUP®

A combination of three different fabrics (see schematic drawing):

1-An «intelligent» fibre adjusting body temperature by evacuating transpiration.

2-An woven mesh optimizing air circulation.

3-A latest generation poly cotton giving structure to the garment.

TECHNOLOGIE HYBRID ®WEAR

The HYBRID WEAR concept consists of mixing together different fabrics in order to create a unique garment: it's the perfect fall of a polyester cotton warp and weft weave coupled with the absolute comfort of a non-deformable technical jersey fabric.
